Summary

Senior Software Engineer with 4+ years of experience in JavaScript, React, and cloud computing. Passionate about solution architecture and modern technologies. Proven expertise in leading teams, configuring CI/CD, and developing scalable web applications.

Key Skills

- React
- Redux
- GraphQL
- Nextjs
- AWS

CI/CD

Languages

- Russian - native
- English - B2

Education

Master in Software Engineering

ITMO University

 2019-2021  Saint Petersburg, Russia

Bachelor in Information Systems and Technologies

ITMO University

 2015-2019  Saint Petersburg, Russia

Work Experience

Senior Software Engineer

EPAM Systems

 Feb 2024 – present  Belgrade, Serbia

A pack of web apps to ship drugs across medical alboratories

Key achievements

- Led a team of frontend developers
- Created and unified CI/CD to deliver all frontend apps to the AWS ECS
- Organised 2 legacy apps rewriting into modern tech stack (React)
- Proposed and finalised an idea for a new web app, it's still under development

Tech stack

React
Redux
Jenkins
AWS
Cypress
TypeScript

Senior Frontend Developer

EPAM Systems

 Dec 2022 – Mar 2024  Istanbul, Turkey

Pack of applications to model entities relations across medical laboratories (e.g. Animal -> has -> Cage -> has -> Number) using tree graph, find and load all coincidences of this model across real databases, register new entities in any connected databases.

Key achievements

- Formed tech stack, organized monorepo with ui kit
- Configured and integrated AAD for all web apps
- Created abstract tree graph builder using Canvas

Tech stack

React
Apollo GraphQL
React-flow
Azure AD
TypeScript

Middle Frontend Developer

EPAM Systems

 Nov 2021 – Dec 2022  St. Petersburg, Russia

App for searching diseases on CT and XRAY screenings using neural network. Frontend part included DICOM images web-viewer that allowed to see and compare original CT or XRAY images (or series of images) with the same images but includes AI findings. This viewer has many functionality, such as layout generation, placing images / images series to the particular layout window, synchronization between layout windows, images transformation, painting etc

Key achievements

- Created DICOM web-viewer
- Created abstract solution for forms and tables
- Significantly improved code reusability during refactoring

Tech stack

React
Redux
Cornerstone.js
React Final Form
TypeScript

Junior Frontend Developer

EPAM Systems

 Nov 2020 – Dec 2021  St. Petersburg, Russia

Frontend of app for tracking drugs fulfillment and their shipment inside laboratories. This project was a copy of legacy Marioneoe + Backbone app.

Key achievements

- Actively participated in tech stack forming and creating app architecture
- Built the whole app
- Covered app with e2e tests

Tech stack

React
Redux
Recoil
Cypress
TypeScript

Intern

EPAM Systems

 Jul 2020 – Oct 2020  St. Peterburg, Russia

Application to track people movements inside buildings

Key achievements

- Extended functionality to track people moves in real time
- Unified app architecture to switch between map providers
- Integrated OSM provider

Tech stack

React
Redux
Google maps API
OSM
